

# ANCHORAGE

Pipe Support Systems & Components

## CAPABILITY STATEMENT

## THE COMPANY

In business since 1997, Australian manufacturer, Anchorage and its parent company (Swift Metal) offer a range of engineered products and manufacturing services for various industries and applications. With the focus on pipe supports, Anchorage offers a range of stocked standard sizes as well as custom versions.

We work with Engineers, projects & process plants that need a reliable partner for all their pipe support & componentry requirements.

### OUR MISSION

Be the best at what we do through a passionate team culture, that builds trusted relationships, thinks creatively & delivers the right solutions

### OUR VISION

To be an indispensable partner to our clients

### OUR VALUES

We do what we say  
We care and respect  
We succeed together  
We are committed  
We go above and beyond

### OUR PROMISE

Outstanding customer service  
Operational Excellence  
Reliability & trust  
Expertise

## OUR STORY

- 1997** Our founding Director, Jim Lindsay saw an opportunity for a successful manufacturing business. Originally in the automotive industry, this was a declining market, and Jim was committed to secure a future for his family.
- 1999** With a purpose-built factory and a growing customer base, Jim's two sons Dan and Kelvin joined the business quickly, and Swift Metal enjoyed strong growth.
- 2004** With growing headwinds from offshore manufacturing, Swift increased investment in automated machinery to improve our service to clients.
- 2007** Swift had grown out of the first factory, and a new purpose built facility was constructed. An ERP system was implemented to ensure we had excellent capacity in all business functions.
- 2009** The GFC saw many of our clients in tough times. Swift Metal strengthened our position in the infrastructure sector, serving clients in Oil & Gas, Mining and construction.
- 2013** With increased demand, a strategic decision was made to develop a dedicated range of pipe supports, and Anchorage was born. To date, excellent growth has been achieved.
- 2019** Anchorage & Swift continue to work side-by-side, and still are dealing with some of the same clients we began with 20 years ago. Our vision is to be the manufacturing leader of pipe supports in Australia.

**The company has developed and prospered throughout economic highs and lows over the years, as well as keeping up with market trends and client's needs. With dedication and a customer-centric approach, Anchorage expects to maintain its continuous growth.**

# ANCHORAGE

# THE INDUSTRIES

“To date, Anchorage staff have been courteous and knowledgeable while the company itself has proved a reliable partner helping us deliver best possible solutions for some challenging projects.”

**Mat Carroll**  
Radcoflex Director

Oil & Gas  
Petrochemical & refineries  
Water Treatment & transfer  
Mining  
Power  
Infrastructure  
Marine  
Paper & Pulp  
Agriculture & Food

## OUR CAPABILITY

It's our focus on efficiency and manufacturing smarts that has meant we can manufacture pipe supports to any site conditions and requirements.

- + Cutting of plate up to 50mm
- + Welding to AS1554
- + PTFE, UHMWPE and other liner material.
- + Produce up to 20,000 parts per day
- + Forming of all steels up to 32mm
- + Punching and drilling
- + Full material traceability available
- + Tool & Jig Making
- + Component assembly
- + Metal stamping
- + Repetition Fabrication
- + All surface finishes and coatings
- + 5 ton Overhead gantry crane
- + 1500m<sup>2</sup> hard stand area
- + Folding up to 3m long

## QUALITY | STANDARDS

Quality is paramount in everything we do. All pipe supports are manufactured in accordance with **AS4041.2006**, and the following standards are adhered to where applicable.

**Manufacturing** AS1554 (welding)  
AS/NZS 4673:2001 (Stainless Steel)  
AS 4100 & AS/NNZS4600 (Carbon Steels)

**Galvanizing** AS4680

**Materials** AS3678-Gr 250 (Carbon Steel)  
AS1548-7-460R for Boiler Plate  
ASTM A 387 Gr 22 for Alloy Steel  
BS EN 10088 (Stainless Steels)

**Forgings** ASTM A29 C1035 Stainless Steel  
AS/NZS 4673:2001

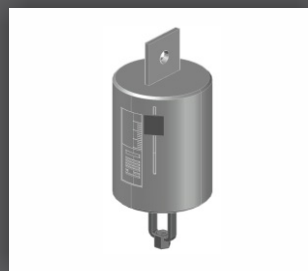

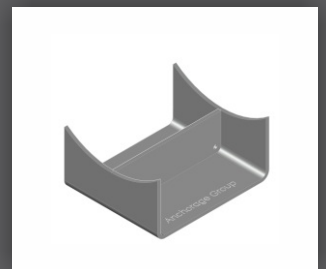

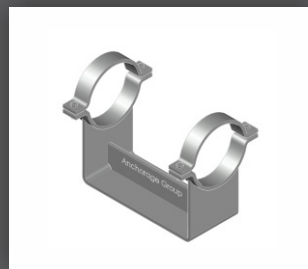

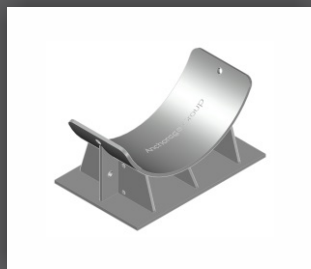

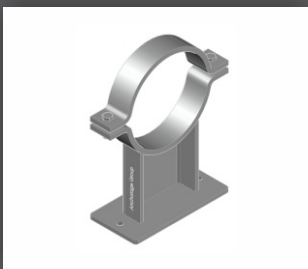

“I have been in the high-pressure role of ensuring that required items are on site, at the right time, in the right quantity and the team at Anchorage has been invaluable at achieving this task, not to mention all items were completed to a high standard and delivered by if not before the deadlines.”

**Jordan Leotta**  
MEFT Alliance | Airport Link Project
